## CHAUTAUQUA TO OPEN MONDAY

Splendid Program Arranged for Marion This Year—High Class Attractions to be Presented

Next Monday the Big Redpath Chautauqua will open with one of the finest programs yet presented. Everything possible has been done by the Redpath program builders to make this year's Chautauqua full of high class entertainment and up-to-the-minute lectures.

The Collegian Male Quartet, a notable singing and brass quartet will be the opening attraction. The Collegians are not only singers and instrumentalists but are also capital entertainers. At night after a popular concert by the Collegians Hon. Charles H. Brough, well-known educator and former governor of Arkansas will give his popular lecture "America's Leadership of the World." He holds the degree of doctor of philosophy from John Hopkins University being one of the few men who have served as governors of American commonwealths to receive this degree. He is well known as a writer on state and national problems.

On the second afternoon some of the most popular scenes from favorite light operas will be given by the Montague Light Opera Company. The members of this company are experienced concert musicians and dramatic entertainers whose abilities have been tested by many seasons of successful Chautauqua tours in every part of the United States. Selections will be given from "Robin Hood," "The Mikado," "Madame Butterfly" and other light opera successes which insure a most pleasant afternoon's program. On the evening of the second day the Montague Light Opera company will give a short concert followed by a lecture by Dr. Hubert W. Hurt. Doctor Hurt is a member of the National Executive Council of the Boy Scouts. During the war he was chief of the educational division of the foreign press bureau of the Committee on Public Information. His lecture, "The New Industrial Day" will be one of the high lights of the week.

On Wednesday afternoon Irene Stolofsky and accompanying artists will give an artists' recital. Miss Stolofsky is one of the leading younger violinists and has captivated audiences in all parts of the United States. Real music lovers will miss a rare treat if they do not hear this splendid concert on the third afternoon. In the evening Miss Stolofsky and assisting artists will give a short concert which will be followed by Sidney Landon in his impersonations of great literary men.

On Thursday the fourth day of the Chautauqua comes the popular Cramme: Kurz Trio. Following their concert Evelyn Hansen will give her lecture-demonstration "Well-Dressed on a Moderate Income." Miss Hansen will use actual models and her talk will be of the keenest interest as well as of practical worth. On the fourth night one of the big features of the Chautauqua will be given. The most enjoyable comedy, "Turn to the Right" will be presented by an all Metropolitan cast. This is a play that is full of good wholesome fun, thrills and the tenderest mellow heart interest.

Lieurance's Little Symphony Orchestra will be the attraction of the fifth afternoon and will give a program that will prove to be a real musical treat. The Little Symphony is composed of four violins, two cellos and a piano. In the evening Judge Marcus A. Kavanagh of Chicago will give his lecture "Traitors to Justice."

"What am I going to do?" "What line of work am I fitted for?" are some of the questions that are puzzling the young man and the young woman of today. On the sixth afternoon Chester Milton Sanford will answer these very questions. Mr. Sanford's subject will be "The Failure of the Misfits." On the sixth night another big feature attraction will be presented. The play "Friendly Enemies" will be given by an "A No. 1" cast and is sure to prove one of the big features of the week.

On the last afternoon Vierra's Hawaiians will give a complete concert. At night they will give a short concert followed by Jess Pugh in his great Joy Night program. Mr. Pugh is a humorist of note and furnishes a happy ending to a week full of good clean entertainments, interest-

## Great Comedy, "Friendly Enemies," a Chautauqua Attraction

"Friendly Enemies" is one of the most popular of recent comedy successes. Scores of cities throughout the country have alternately laughed and wept over this irresistible comedy drama whose plot grows out of the conflicting convictions of two lifelong friends. A complete production of "Friendly Enemies" will be given at the coming Redpath Chautauqua by a cast of experienced Broadway actors organized by William J. Keighley, manager of the New York City Producing Department of the Redpath Bureau.

### Farm Bureau Notes

#### Lambs

Two car loads of lambs and sheep were marketed Saturday June 17 at Marion in co-operation with W. D. Sullenger live stock dealer. The lambs for the top car were docked and castrated withers and docked ewe lambs all carrying some little fat. The docked and castrated lambs sold for \$10.50 and those not treated for \$9.50 a cwt. In brief it means the farmers who docked and castrated received an average of about 70c more per lamb than those who did not. The treated lambs presented a much neater appearance as well. Any farmer can well afford to treat his lambs for 70c and remember the losses run less than one percent.

The lambs were quite noticeable that came from pure-bred flocks standing out plainly above those of scrub breeding in weight and mutton type. No farmer can afford to use anything but a pure bred buck on his ewes.

The market has dropped over \$1.50 in the last 10 days. If the lambs could all have been at 70 pounds on June 1 the profits realized would have been considerably greater. Every sheep owner should plan this summer to use a pure bred buck, breed in September and have February lambs, castrate and dock at two weeks, push right along by proper feeding until pasture is good, market at 70 pounds the first of June and avoid the hot weather and summer parasites. You will find also the price is better at this time than later.

Sheep are good to clean up sawbricks, sassafras bushes and weeds. Crittenden County's 1922 wool pool ran 85 percent clean wool and the buyers on learning that this county produces a very desirable quality of wool. Plan to foster and improve that reputation. Many parts of this county are ideal for sheep and good sheep properly cared are profitable.

#### The County Fair

Are you planning on having an exhibit at the Crittenden County Fair this fall? It will come in the early fall and will be the biggest fair the county has ever had. Liberal pre-

ing and instructive lectures and splendid concerts.

There has also been arranged a Junior Chautauqua for the children which will start the third morning when characters from the story books will be given by Katherine Scott and Catherine Denny. On the fourth morning the Kramer Kurz Trio will entertain the youngsters and the fifth day will see them mystified by the Duval Brothers, two clever magicians. On the sixth morning Mary Mason's Mariettes will bring the Junior Chautauqua to a close and the kiddies will have a wonderful week of fun and amusement.

iums and a real fair all the way thru.

#### Kentucky Crops

General crop conditions in Kentucky are shown to be 11.6 percent above the 10 year average in the farm crop report for this state issued by the United States Bureau of Markets in co-operation with the State Commissioner of Agriculture W. C. Hanna. The condition of crops in Kentucky June 1 indicated the production of approximately 8,644,000 bu. of wheat; 6,550,000 bu. of oats, 176,000 bu. of barley; 239,000 bu. of rye; 1,222,000 tons of hay; 3,943,000 bu. of apples and 1,102,000 bu. of peaches. Actual yields may turn out less or more than these estimates, depending on whether conditions are favorable or unfavorable between now and the time crops are harvested or gathered.

Make use of the exchange list in the County Agent's office. The more that use it the more valuable it becomes.

#### A CALL

Democratic County Committee is called to meet at the Court House in Marion Saturday June 24 at 1:30 o'clock. Full attendance is urged for the transaction of very important business.

C. S. NUNN, Chairman.

#### MRS. WYNNS DIES

Mrs. Nancy Wallace Wynns, wife of the late Rev. W. W. Wynns, died Saturday at her home at Sullivan, aged 80 years. She was a well known and much respected woman of that section.

Funeral services were held at 11 o'clock Sunday at the Cumberland Presbyterian church at Sullivan, conducted by Rev. W. T. Oakley in the presence of a large congregation. The remains were laid to rest in the new cemetery at Sullivan. Mrs. Wynns is survived by seven children.

#### DIDN'T HAVE HYSTERICS

Mrs. D. H. Postlethweight, whose faithful experience with the snake was given in the Press last week and whose heroism on that occasion will be admitted by even the most cynical of our readers was in our office a few days ago and told the news editor that the paper had it wrong. It was not she who had hysterics, but it was Dave who was hysterical. Her husband who was present and heard the accusation, did not deny it. The Press is glad to make the correction.

#### SUNDAY-SCHOOL CONVENTION

The Crittenden County Sunday School Convention will be held at Pleasant Hill church Friday July 28. All Sunday schools are asked to send representatives and all Sunday school officers are invited to be present.

E. F. DEAN, Co. Pres.

### NEW BUILDING TO BE ERECTED

Miss Mary Cameron is having laid the foundation of a brick building on the west side of South Main Street, on the site of the residence building which was destroyed by fire some ago. It will be a one-story structure and will be divided into two store rooms each 24x72 feet. Mr. G. E. Boston is superintending the work.

#### TEACHERS EXAMINATION

The second examination of the year for applicants for certificates to teach school was held Friday and Saturday June 16-17. Fifteen applicants for certificates were before the county board of examiners. This is the last examination to be held under the old law. Hereafter all persons must attend High School before becoming qualified to teach school.

At the first examination held on May 19-20, thirty-six applicants were examined and out of this examination the State Board of Education awarded fifteen elementary certificates to teach.

#### WILSON HILL RESIDENCE

The Wilson Hill farm residence near town is being papered, painted overhauled and otherwise improved. Among the improvements to be put in being a concrete floor and a back porch, under which is to be constructed a cellar seven feet deep walled with brick, all of which will add much to the appearance and utility of the building.

#### BLEW DOWN SMOKE STACK

During the wind storm last Saturday afternoon—the smoke stack of the Marion Electric Light and Ice Company was blown down. Temporary arrangements were made and the service was not interrupted. A new stack is now being placed in position, which when completed, will be the best one since the plant was built.

### FAIR SERVICE TO BE FURNISHED BEGINNING ON MONDAY JUNE 26

For the accommodation of many friends who have made the request, we will furnish current for fans and such other uses as demanded, beginning at noon, 12 o'clock sharp each week day and continue through the afternoon. The Tuesday and Thursday morning service will be discontinued.

Marion Electric Light Ice & Water Co. S. M. JENKINS.

Prof. Jno. Y. Brown who has been re-elected as Athletic Coach and English teacher of the Marion High School is Superintendent during the summer of the White and Myers Chautauqua.

### POPULAR MARION GIRL WEDS IN TEXAS

A pretty home wedding in which Miss Mary Juliet Pope of Marion, Kentucky, became the bride of Mr. Burch Gregg of Dalhart, occurred at the home of Mr. and Mrs. M. H. Belev in the Pleasant Grove community Wednesday afternoon at four o'clock. The home was beautifully decorated with pink and white flowers.

The bride entered with Miss Clara Belev, maid of honor, while Mr. Harley Burton was best man. Mr. M. Young of Fort Worth rendered Lohengrin's wedding march as the bridal party entered. President J. L. Ward of Decatur Baptist College, officiated, using the ring ceremony during which Mrs. Young at the piano softly played "Meditation." The party retired to the strains of Mendelssohn's march.

Only a few guests besides relatives were present.

The bride of this happy occasion is one of Kentucky's fairest belles, and is a member of one of the oldest families of the Blue Grass state. She is the daughter of Mrs. Elizabeth Pope of Marion, Kentucky. For several years she has been a member of the faculty of the Tishomingo, Oklahoma high school and she is highly regarded in that city for her value as an instructor and her personal worth and lovable disposition. On several occasions she has been the guest of Miss Belev, who also teaches in Tishomingo, at the Belev home south of Decatur and it was during one of these visits that the romance began which on Wednesday culminated in uniting the lives of these splendid young people. The bride is a very attractive young lady talented to a high degree and her charming personality has gained for her many friends in this community.

Mr. Gregg is a native of this vicinity and has grown to manhood here. He is well known as an honorable, industrious and successful young man and a member of one of the oldest and most highly respected families, being the son of Mr. and Mrs. M. Gregg. During the World War Burch served his country with the ninetieth division in France. He is now a member of the Ely-Hess Company, wholesale grocers. Mr. Gregg makes and holds many good friends and his energy and ability portend a successful future in the business world.

Messenger joins the many friends in hearty congratulations. Mr. and Mrs. Gregg left Wednesday for their new home in Dalhart, Decatur (Tex.) Messenger.

Miss Frances Gray spent Saturday and Sunday in Evansville.

Miss Virginia Reed represented the Marion Methodist Sunday School at the Annual Assembly for Sunday School workers of the Louisville Conference held at Russellville last week.

## BRIDGE MEETING HERE TUESDAY

Union and Crittenden County Representatives Meet in Joint Session

Some forty or more citizens of Morganfield and Sturgis, representing the Kiwanis Clubs of these cities drove over from Union county Tuesday to attend the bridge meeting held at the court house here at 1:30 o'clock Tuesday. Owing to the lack of proper advertising only a small number of Crittenden county people were present at the meeting. Previous to this the fiscal court of Union county had appropriated the sum of \$12,000 as that county's part in the construction of a proposed bridge across Tradewater river at the mouth of Cypress, the boundary line between the two counties.

County Judge E. Jeffrey Travis gave the opening address explaining the object of the meeting. He told them he wanted the bridge. He said the people of the two counties were not as closely allied as they should be.

Mayor Kern of Sturgis gave the next address. He advised co-operation between the two counties and said the building of the bridge would be the means of more closely uniting the people as neighbors and friends.

Supt. Jenkins of the West Kentucky Coal Co. addressed the meeting and stressed the business advantages of the bridge across Tradewater.

Supt. Herbert of Bell Coal & Navigation Co. said the citizens of the northern part of Crittenden deserved and ought to have the bridge. He said that in the days of Daniel Boone and the Indians when they wanted to cross Tradewater they crossed in a boat. He told them that in that respect that part of the county had not improved—they still had to cross in boats. He said it was not right to force those people to endanger their future lives by crossing like a blue streak every time they tried to cross Tradewater and got stuck in the mud.

Judge J. W. Blue was called for and responded. He said he might be called a liner as he owned property on both sides of the line. He wanted the bridge but not from a selfish standpoint. He believes that the people of Crittenden if given a vote would be for the bridge.

Judge C. S. Nunn was called for and in response he told them that his forebears resided in the northern part of the county. He wanted the bridge and thought it ought to be and would be built.

The meeting closed with an address by J. F. Dodge in which he said he was interested in both counties and wanted the bridge so that he could the better make the trips back and forth.

### MARION GIRL WEDS

Mr. Otis Boyd Taylor and Miss Ruby Asher were married at the home of Dr. F. F. Brown, pastor of the First Baptist church of Knoxville, Tenn., Monday afternoon at 5:30. The marriage is the culmination of an engagement lasting seven years and began while the two were attending the University of Kentucky. Mr. and Mrs. Lewis E. Shaver, of Crawfordsville, Ind., attended the ceremony.

Mrs. Taylor comes from a prominent family of Marion, Ky., and has been engaged in teaching in the public schools at Paducah and Marion, and this past term taught in the Marion High School. Besides attending the University of Kentucky she also attended the State Normal of Kentucky for one year.

Mr. Taylor came to the sanatorium in January and has been a patient here since that time. On resignation of Mr. Stamm as local in March of this year he was elected Post-Commander. He has held the post of vice commander prior to this for nearly a year. He attended the University of Wisconsin for one year and then attended the University of Kentucky receiving the degree of Bachelor of Science in two and one half years. He is a member of the Alpha Sigma Chi fraternity. During the war he served with the 87th Division and was later assigned to the Balloon Corps as Sgt. 1st class.

Mr. and Mrs. Taylor will be at home to their many friends in Johnson City after June 26th.—Johnson City Staff, Johnson City, Tenn.

## CHAPTER XVIII—Continued.

A last curve, and they knew. Over one of the sharpest and ugliest of the descending precipices, crashing down through the saplings and underbrush and striking the trunks of a score of trees on its way, the heavy car had fallen like a boulder. And Peter saw that it was Alix's car, and with a great cry he sprang over the bank and, slipping and stumbling, followed its mad course down almost to the dry creek bed in the canyon, and fell on his knees beside the huddled figure that, erect and strong, in its striped blue gingham, had been Alix only a few short minutes ago.

She had been dazed clear of the car, and although every bone in her body was broken, by some miracle the face, except for a deep cut where the brown hair met the tanned forehead, was untouched. And as he caught her in his arms and bent over her with the bitterness of death stopping his own heart, a soft, thick braid loosened and fell like the touch of her hand upon his own, and it seemed to him that in the tranquil face and in the very look of the closed and fast-shadowing eyelids he caught a glimpse of Alix's old smile.

Peter forgot everything else in the world. He held her close to him and put his face against her face, and perhaps she had never so truly been his own as in this moment of their parting, when the quiet autumn woodland, shot with long shafts from the sinking sun, rang with his bitter cry:

"No, Alix—not dead! My wife—my wife!"

There were other men and women gathering fast now, and the whole little valley was beginning to ring with the tragedy. After a while some sympathetic man touched Peter on the arm to say that Mrs. Lloyd had fainted, and that if he would please tell them what to do about the other man—he was not yet dead—

Peter roused himself, and with help from half a dozen hands on all sides he carried Alix up to the road and laid her upon a motor robe that some kindly spectator had spread in the deep dust.

Presently he was conscious that a small, slight woman with disorderly fair hair and with her face streaked with dust and tears was standing beside him, and looking down at her, he saw that it was Cherry.

"Yes, Cherry?" he said, moistening his dry lips.

"Peter," she said, "they say Martin's living—he was screaming—" She grew deathly pale and faintness swept

Peter Saw They Were Lifting Martin's Big, Senseless Form.

over her, but she mastered it. "He was caught by that tree," she said. "And he is living. Will you tell them—tell one of these men—that if he will help me, we can drive him home. If you'll tell him that, then I'll get a doctor."

"Yes, I will," Peter said, not stirring. His eyes had the look of a sleep-walker; he nodded slowly and gravely at her, like a very old man. "You—"

he said to a man who had stopped his car near by and who was pressing sympathetically close. "Will you—?"

"If you'll sit in the back seat, dear, and just rest your poor head," a woman said to Cherry. Peter saw that they were lifting Martin's big, senseless form in tender hands and carrying it through the little group. There was a shudder as Martin moaned deeply. Peter went and sat on the low bank by Alix again, and lifted one of her limp hands, and held it. Ah, if in God's mercy and goodness she might

light for him again! But she did not stir.

"Gone!" said Cherry's heartrending voice, a mere whisper, beside him.

He turned upon her lifeless eyes. "Gone," he echoed.

"Oh, Alix—my darling! My own big sister!" Cherry sobbed, falling to her knees and passionately kissing the peaceful face. "Oh, Alix, dearest!"

The women about broke into tears. Peter pressed his hand close against his aching eyeballs, wishing that he might cry.

"She drove here," he heard a man's voice saying in the silence, "and she must have lost control of her car for a minute. Then—do you see?—the wheel slipped on the bank. Once it got this far, no power in God's earth—"

"No power in God's earth!" another man's voice said in solemn confirmation.

"Peter," Cherry said, "will you come to me as soon as you can? I shall need you."

"As soon as I can," he answered absently.

The car drove away, and he heard Martin moan again as it moved.

"Joyce," said a man's kind voice close beside him. He recognized the voice rather than the distressed face of an old friend and neighbor. "Joyce, my dear fellow," he urged affectionately, "tell us what we may do and we'll see to it. Pull yourself together, my dear chap. Now, shall I telephone for an ambulance? You must help us just a little here and then we'll spare you everything else."

"Thank you, Fred," Peter answered after a moment. "Thank you. Will you help me take my wife home?"

"You wish it that way?" the other man said anxiously.

"Please," Peter answered simply. And instantly there was moving and clearing in the crowd, a murmuring of whispered directions.

After a while they were at the mountain cabin, and with tears running down his yellow face, was helping them. Then they went into the old living room, and Alix was lying there, splendid, sweet, untouched, with her brave, brown forehead shadowed softly by her brown hair, and her lashes resting upon her cheeks, and her fingers clasped about the stems of three great, creamy roses.

There were other flowers all about, and there were women in the room. White draperies fell with sweeping lines from the merciful veiling of the crushed figure, and Alix might have been only asleep, and dreaming some heroic dream that lent that secret pride and joy to her mouth and filled those closed eyes with a triumph they had never known in life.

Peter stood and looked down at her, and the men and women drew back. But although the muscles of his mouth twitched, he did not weep. He looked long at her, while an utter silence filled the room and while twilight deepened into dark over the cabin and over the mountain above it.

"So that was your way out, Alix?" Peter said in the depth of his soul. "That was your solution for us all? You would go out of life, away from the sunshine and the trees and the hills that you loved, so that Cherry and I should be saved? I was blind not to see it. I have been blind from the very beginning."

Silence. The room was filling with shadows. On the mantel was a deep bowl of roses that he remembered watching her cut—was it yesterday or centuries ago?

"I was wrong," he said. "But I think you would be sorry to have me face—what I am facing now. You were always so forgiving, Alix; you would be the first to be sorry."

He put his hand over the tigerish pain that was beginning to reach his heart. His throat felt thick and choked, and still he did not cry.

"An hour ago," he said, "if it had been that the least thought of what this meant to you might have reached me an hour ago. It would not have been too late. Alix, one look into your eyes an hour ago might have saved us all!" Peter said aloud, with a bitter groan, clenching tight the hands of the old friend who had crept in to stand beside him. "Fred, she was here, in all her health and joy and strength only today. And now—"

"I know—old man—" the other man muttered. He looked anxiously at Peter's terrible face. In the silence the dog whimpered faintly. But when Peter, after an endless five minutes, turned away, it was to speak to his friend in an almost normal voice.

"I must go down and see Cherry. Fred, she took her husband to the old house; they were living there."

"Helen will stay here," the old man assured him quickly. "I'll drive you down and come back here. We thought perhaps a few of us could come here tomorrow afternoon, Peter," he added timidly, with his reddened eyes filling

again, "and talk of her a little, and pray for her a little, and then take her to—to rest beside the old doctor—"

"I hadn't thought about that," Peter answered, still with the air of finding it hard to link words to thought. "But that is the way she would like it. Thank you—and thank Helen for me—"

"Oh, Peter, to do anything—" the woman faltered. "She came to us, you know, when the baby was so ill—day after day—my own sister couldn't have been more to us!"

"Did she?" Peter asked, staring at the speaker steadily. "That was like her."

He went out of the house and got into a waiting car, and they drove down the mountain. Alix had driven him over this road day before yesterday—yesterday—no, it was today, he remembered.

"Thank God I don't feel it yet as I shall feel it, Thompson!" he said quietly. The man who was driving gave him an anxious glance.

"You must take each day as it comes," he answered simply.

Peter nodded, folded his arms across his chest, and stared into the early dark. There was no other way to go than past the very spot where the horror had occurred, but Thompson told his wife later that poor Joyce had not seemed to know it when they passed it. Nor did he give any evidence of emotion when they reached the old Strickland house and entered the old hallway where Cherry had come lying in, a few short years ago, with Martin's first kiss upon her lips.

Two doctors, summoned from San Francisco, were here, and two nurses. Martin had been laid upon a hastily moved bed in the old study, to be spared the narrow stairs. The room was metamorphosed, the whole house moved about it as about a pivot, and there was no thought but for the man who lay, sometimes moaning and sometimes ominously still, waiting for death.

"He cannot live!" whispered Cherry, ghastly of face, and with the utter chaos of her soul and brain expressed by her tumbled frock and the carelessly pushed back and knotted masses of her hair. "His arm is broken, Peter, and his leg crushed—they don't dare touch him! And the surgeon says the spine, too—and you see his head! Oh, God! It is so terrible," she said in agony, through shut teeth, knotting her hands together. "It is too terrible that he is breathing now, that life is there now, and that they cannot hold it!"

She led Peter into the sitting room, where the doctors were waiting.

"Is there any hope?" he asked, when Cherry had gone away on one of the restless, unnecessary journeys with which she was filling the endless hours. One man shook his head, and in the silence they heard Martin groan.

"It is possible he may weather it, of course," the older man said doubtfully. "He is coming out of that first stupor, and we may be able to tell better in a short time. The fact that he is living at all indicates a tremendous vitality."

Cherry came to the door to say "Doctor" on a burst of tears. The physicians departed at once to the study, and Peter was immediately summoned to assist them in handling the big frame of the patient. Martin was thoroughly conscious now; his face chalk white, Cherry, agonized, knelt beside the bed, her frightened eyes moving from face to face.

There was a brief consultation, then Cherry and Peter were banished.

Peter watched her with a confused sense that the whole frightful day had been a dream. Once she looked up and met his eyes.

"He can't live," she said in a whisper.

"Perhaps not," Peter answered very low. Cherry returned to her somber musing.

"We didn't see this end to it, did we?" she said with a pitiful smile after a long while.

"Oh, no—no!" Peter said, shutting his eyes and with a faint, negative movement of his head.

"Poor Cherry—if I could spare you all this!" knotting his fingers and feeling for the first time the prick of bitter tears against his eyelids.

"Oh, there is nothing you can do," she said faintly and wearily after a while. And she whispered, as if to herself, "Nothing—nothing—nothing!"

## CHAPTER XIX.

It was all strange and bewildering, thought Peter. It was not like anything he had ever connected in his thoughts with Alix, yet it was all for her.

The day was warm and still, and the little church was packed with flowers and packed with people. Women were crying, and men were crying, too, rather to his dazed surprise. The organ was straining through the warm, fragrant air, and the old clergyman, whose venerable, leonine head, in its crown of snowy hair, Peter could see clearly, spoke in a voice that was thickened with tears. Strangers, or almost strangers, had been touching Peter's hand respectfully, timidly, had been praising Alix. She had been "good" to this one, "good" to that one, they told him; she had always been so "interested" and so "happy."

Her coffin was buried in flowers, many of them the plain flowers she loved, the glories and stock and verbenas, and even the sweet, sober wall-flowers that were somewhat like herself. But it was the roses that scented the whole world for Alix today, and fresh creamy buds had been placed between the waxen fingers. And still that radiant look of triumphant love lingered on her quiet face, and still

the faint ghost of a smile touched the once kindly and merry mouth.

They said good-by to her at the church, the villagers and old friends who had loved her, and Peter and two or three men alone followed her down along the winding road that led to the old cemetery. Cherry was hanging over the bedside of her husband, who still miraculously lingered through hours of pain, but as Peter, responsive to a touch on his arm, crossed the church porch to blindly enter the waiting motor car, he saw, erect and grave, on the front seat, in his decent holiday black, and with his felt hat held in his hands, Kow, claiming his right to stand beside the grave of the mistress he had loved and served so faithfully. The sight of him, in his clumsy black, instead of the usual crisp white, and with a sad and tear-stained face shook Peter strangely, but he did not show a sign of pain.

The twisted low branches of oak trees threw shadows on the grave when they finally reached it, and sheep were cropping the watered grass of the graveyard. The soft autumn sky, the drift of snowy clouds across the blue, the clear shadows on brown grass under the oaks, all these were familiar. But Peter still looked dazedly at his black cuff and at the turned earth next to the doctor's headstone, telling himself again that this was for Alix. How often he had seen her sitting there, with her bright face sobered and sweet, as she talked lovingly, eagerly of her father! They had often come here, Peter the more willingly because she was so sensible and

happy about it; she would pack lunch, button herself into one of the crisp blue gingham, chatter on the road in her usual fashion. And if, for a few moments, the train of memory fired by the sight of the old doctor's grave became too poignant and tears came, she always scolded herself with that mixture of childish and maternal impatience that was so characteristic of her, and that Peter had seen her use to this very father years ago!

This Was Alix's Grave, Newly Covered With Flowers.

He remembered her, a tall, awkward girl, with a volume of Dickens slipping from her lap as she sat on a hassock by the fire, teasing her father, scolding and reproaching him. Blazing red on her high cheekbones, untidy black hair, quick tongue and ready laugh; that was the Alix of the old days, when he had criticized and patronized her, and told her that she should be more like Anne and little Cherry!

He remembered being delegated, one day, to take her into town to the dentist, and that upon discovering that the dentist was not in his office, he had taken her to the circus instead. She had been about thirteen, and had eaten too many peanuts, he thought, and had lost a petticoat in full sight of the grandstand. But how grateful and happy she had been!

"Dear little old blue petticoat!" he said. "Dear little old madcap Alix—" There was silence, the silence of inattention, about him. He came to himself with a start. He was up on the hills, in the cemetery—this was Alix's grave, newly covered with willing masses of flowers, and he was keeping everybody waiting. He murmured an apology; the waiting men were all kindness and sympathy.

(TO BE CONTINUED.)

**Salt and Dampness.** Salt is what is called "hygroscopic," that is, it eagerly absorbs moisture. In fact, both air and salt are absorbents of moisture and it is a contest between them as to which gets it. Results depend on atmospheric conditions. Ordinary atmosphere always contains a proportion of moisture, and warm air is apt to be more humid than cold, as it absorbs and holds water vapor more readily than cold air. Salt has such affinity for moisture that under such conditions it draws it from the air. When the air becomes dry, the moisture is given up by the salt, which in turn becomes dry as it returns the moisture to the air.

**Make Funnel From Eggshell.** When it is desired to fill narrow-necked bottles and a funnel is unavailable, one can be improvised from an eggshell. The shell should be quite dry, and a small opening made at the bottom. Stand the shell so that the hole is well over the opening of the container to be filled, and proceed as with a regular funnel.

## Stories of GREAT INDIANS

By ELMO SCOTT WATSON

Copyright, 1922, Western Newspaper Union

### SCAR FACE CHARLEY, LEONIDAS OF THE MODCOS

ONE April day in 1873 a party of 70 soldiers commanded by Capt. Evan Thomas suddenly found themselves in a death trap in the lava beds of northern California. Within a few minutes the murderous fire from a hidden enemy had disabled more than half of the command.

As suddenly as the Indian fire had begun, it stopped and the survivors heard a voice shouting to them: "You who are not dead had better go home; we don't want to kill you all in one day!" It was the voice of Scar Face Charley, the leader of a Modoc war party. With a force of only 21 warriors he had killed 32 and wounded 18 of the soldiers. Wearied of the slaughter, he allowed the remainder to escape. Afterwards he said: "My heart was sick at seeing so many men killed."

The career of Scar Face Charley (Chikicham Lupukuelatko—"Wagon Scar Faced"), called the "Leonidas of the Lava Beds," in the Modoc war, was one of strange contrasts. At the opening of the conflict he had visited the homes of many settlers and, warning them that war was coming, told them to stay quietly in their homes and the Modocs would not molest them. He had fired the opening gun of the war when soldiers "jumped" the Modoc camp in November, 1872.

When Captain Jack, the chief, wanted to make peace Charley was one of the warriors who taunted him and forced him to continue fighting. Then he protested against the murder of General Canby and Doctor Thomas calling it "unworthy of the heart of a Modoc." When he saw that the Modoc cause was hopeless he surrendered to the military and enlisted as a scout.

One night Black Jim and Curly-Headed Doctor, two of the most warlike Modocs, denounced him as a traitor and threatened to kill him. Walking over to the fire and standing there in the full blaze of the burning logs, he said: "Mee, put on some more wood for I want Black Jim and the Doctor to have a good light to shoot me by." His bluff was not called.

Charley continued in the service of the soldiers until they had run Captain Jack to earth. When the chief and five others were tried before a military court for murdering the peace commissioners, he was one of the witnesses who spoke most earnestly in behalf of the condemned men.

At the close of the Modoc war Charley with his people as military prisoners were deported to Oklahoma where the "Wagon Scarfaced" died December 3, 1890.

### CHIEF QUANAH PARKER, "THE WHITE COMANCHE"

ON FEBRUARY 23, 1911, Chief Quanah Parker lay dying in his house, the "White House of the Comanches" near Cache, Okla. When a white doctor had failed to save his life, Quanah, the medicine man, entered. Placing his arm about the dying chief, Quanah flapped his hands and imitated the call of the Great Eagle, the messenger of the Great Spirit. "Father in Heaven, this our brother is coming," he prayed. A moment later, Quanah, the son of a white mother, a chief who had lived the white man's way for 35 years, died an Indian.

Quanah's mother was Cynthia Ann Parker, a white woman who had been captured by his father Nokoni, "The Wanderer," in 1835, when she was only twelve years old. She bore him three children, two sons and a daughter. A son born in 1845 was given the name Kwahni, "fragrant." When friends of the Parker family visited the Comanche camp to persuade her to return to civilization she said, "I am happy with my husband and children. I have no desire to be anything but an Indian." In 1860 Texas Rangers under Gov. L. S. Ross attacked the Comanche camp, killed Nokoni and captured Cynthia Ann Parker and her two-year-old daughter. The sons escaped.

When the "White Indian" was restored to her people, it brought her no joy for she mourned incessantly for the Indian camp and especially for her sons. Soon afterwards, during a council with the Comanches, some army officers told young Quanah, or Kwahni, that his mother was still alive and they tried to induce him to make his home with her. It was in vain. The boy had never known anything but Indian life. In 1894 Cynthia Ann Parker died, still mourning for her son.

Quanah rose to the position of war chief of the Comanches and in the war with the Southern Plains tribes in 1874 he was the last to surrender. When he did he encouraged his people in traveling the white man's road.

In his last years Quanah brought his mother's body from Texas and buried it near his home. Then he worked unceasingly to have a suitable memorial erected over the grave. Finally congress appropriated \$1,000 for that purpose and two weeks before Quanah died the monument was built. The body of Quanah, the chief of the Comanches, was buried nearby, and the white mother and her Indian son were reunited at last.

## WORKING GIRLS LOOK HERE

Read What Mrs. Lucas Writes Concerning Her Troubles, Which May be Just Like Yours

St. Louis, Mo.—"I had troubles that all women are apt to have, with pains in my back, weak, tired, nervous feelings and a weak stomach. I had been this way about a year and was unable to work or stand on my feet for any length of time. My husband's aunt told me how much good Lydia E. Pinkham's Vegetable Compound had done her and begged me to try it, so I did. All my pains and weakness are gone, my stomach is all right and I do my work at home and also work for Swift's Packing Company. I recommend your Vegetable Compound to my friends and you may publish my letter as a testimonial."

—Mrs. LULU LUCAS, 719A Vandeventer St., St. Louis, Mo.

Again and again one woman tells another of the merit of Lydia E. Pinkham's Vegetable Compound.

You who work must keep yourself strong and well. You can't work if you are suffering from such troubles. Mrs. Lucas couldn't. She tried our Vegetable Compound and her letter tells you what it did for her. Give Lydia E. Pinkham's Vegetable Compound a fair trial now.

## GREEN MOUNTAIN ASTHMA COMPOUND

quickly relieves the distressing paroxysms. Used for 25 years and gives relief in treatment of throat and lung diseases by Dr. J. H. Green. FINEST TREATMENT. BOX, Treatise on Asthma, its causes, treatment, etc., sent upon request. Price, \$1.00. At all druggists. J. H. GREEN CO., BUFFALO, N. Y.

As to Talebearing. Thou shalt not go up and down as a talebearer among thy people; neither shalt thou stand against the blood of thy neighbor; I am the Lord. Leviticus: 19:16.

## SAVE SHOES AND STOCKINGS

They will last twice as long if you shake Into Your Shoes ALLIEN'S FOOT-KEAR, the powder for the feet. It takes the friction from the shoe and gives quick relief to Corns, Bunions, Chafes, sore, aching, swollen, tender feet. Shake Allen's Foot-Kear into your shoes and enjoy the same of feet without an ache.—Advertisement.

Natural Climax. "Jim Atkins is dead." "How come?" "He stuck his head into the Red Dog saloon and hollered fire." "Well?" "They did."

## FOR HURTS AND SORENESS

Apply Vacher-Balm. Nothing is "just as good," no matter what you pay. Ask your druggist, E. W. Vacher, Inc., New Orleans, La.—Advertisement.

Usually So. "Whom does the baby resemble?" "If I am correctly informed, he gets his beautiful eyes from my wife's family and his weak chin from mine."—Judge.

The Cuticura Toilet Trio. Having cleared your skin keep it clear by making Cuticura your every-day toilet preparations. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

Feather Gluttons. Ransom Kennicott, chief forester in the Illinois forest preserve district, says that robins eat more than other birds.

## Help That Aching Back!

Is your back giving out? Are you tortured with backache and stabbing pains? Does any exertion leave you "all played out"? Feel you just can't keep going? Likely your kidneys are to blame. Overwork, strains, hurry and worry tend to weaken the kidneys. Backache is often the first warning. Headaches and dizziness may come, too, and annoying bladder irregularities. Help the kidneys with Doan's Kidney Pills—the remedy recommended by thousands. Ask your neighbor!

## A Mississippi Case

J. W. Essel, Wagner St., Water Valley, Miss., says: "I felt miserable, tired and weak most of the time. Sometimes I had such pains in my back and kidneys that it seemed to be being torn to pieces. My kidneys acted so often that I was up and down all night. The doctor told me the trouble was caused from weak kidneys and he advised me to try Doan's Kidney Pills. After I had used three boxes of Doan's I was well."

Get Doan's at Any Store, 50c a Box. DOAN'S KIDNEY PILLS. FOSTER-MILBURN CO., BUFFALO, N. Y.

## COULD NOT HIT A LICK FOR MONTHS

Petersburg Resident Says She Had About Lost Hope of Getting Better—Now Well and Happy.

"Tanlac has been such a blessing to me I can't help singing its praises," said Mrs. T. J. Archer, highly esteemed resident of 1147 Shepard St., Petersburg, Va.

"I had indigestion so bad I couldn't eat a thing without being in misery for hours, and the pain around my heart caused by the gas seemed all I could stand. I constantly had headaches and awful spells of dizziness. Then to make matters worse rheumatism in my arms, shoulders and knees almost drove me to distraction, and for three months I couldn't do a stroke of work."

"I had just about decided it was no use to take any more medicine when my husband brought me a bottle of Tanlac. Now I never have a touch of indigestion. Headaches and dizzy spells are a thing of the past, and rheumatism has left me entirely. I never have known a medicine to equal Tanlac."

Tanlac is sold by all good druggists.

### The Cashier.

A young woman went to call on a friend who had entertained her. The latter's five-year-old daughter, who was playing on the lawn, said, "Mamma isn't at home."

"I am sorry," replied the young woman, "for I have come to pay my party call."

"Oh, I'll take the money," said the child promptly.

### Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

### Warning!

As a motorist, we desire to voice the indignation of all other motorists, and to say that if these pedestrians don't quit walking into our cars and bending the bumpers all up, we'll start a national movement to make it a misdemeanor to cross the street.

Personally, we haven't hit anyone yet, but we feel it coming on.—Richmond Times-Dispatch.

## THE PRAYER OF A HORSE

By Laurence E. Cash.

O MAN, my Lord and Master, hear Thou my prayer:

Water me, feed me, keep me clean and work me in reason. O Lord, when my day's work be done give me shelter from rain, wind and cold and a clean, dry bed in a stall well enough for me to lie down in comfort. Do not tie my head in an unnatural position or cut off my tail, which is my only defense against flies. Do not, O Man, drive me rapidly down hill. O Lord, do be merciful and considerate of me in hot weather, and do not kick, strike or otherwise abuse me when I do not understand your desires. Prod me not with merciless spurs. Teach Thou me to understand Thy desires. Speak gently unto me. O Lord, Thy voice means more to me than whip and reins. I have a sense of humor. Play with me, and pet me, O Man, and I will gladly lend myself to Thee in willing service.

Have mercy on me, O Master, when I have colic, and do give me one spoonful of Di-Col-Q. It will relieve me quickly. When I have scours drench me with Di-Col-Q. And, O Master, when I be galled, have sores on shoulders or back, wire cuts, scratches, mange or swellings, apply Thou Di-Col-Q to mine affected parts and I will praise Thee for relief from mine afflictions. Di-Col-Q will enable me to do Thy bidding with delight.

O Man, Di-Col-Q is just as good for similar human ills.

Remember, O Lord, Di-Col-Q is made in mercy by New York Drug Concern, 401 Lafayette Street, New York City. Praise Thou this firm for their alleviation of beastly ills.

O Master, when I fail to eat examine my mouth for the cause. Do not work me when I can not eat. Be merciful unto me, O Man, and I will serve Thee and Thy family many years with a glad heart.

Finally, O Lord, when my youthful beauty and strength be gone, and my days of service ended, neither turn me out to starve and freeze, nor sell me to some cruel man to be tortured. O Man, if Thou be financially unable to care for me in my old days, take Thou my life in the kindest way.

Hear and answer my prayer, O my Lord, and YOUR God will reward you both here and in the hereafter.

With all reverence I so pray unto Thee in the name of Him, who was born in a manger.—AMEN.

## BETTER DEAD

Life is a burden when the body is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take

The National Remedy of Holland for over 200 years; it is an enemy of all pains resulting from kidney, liver and uric acid troubles. All druggists, three doses. Look for the same Gold Medal on every box and accept no imitation.

## POULTRY

### FATTENING MARKET POULTRY

Great Variety of Feeds Can Be Used in Preparing Fowls—Broilers Grow Rapidly.

(Prepared by the United States Department of Agriculture.)

The most desirable types of fowls and the most profitable feeding periods for the different classes of poultry fattened in packing plants are discussed in Department Bulletin 1052, *Rations for Feeding Poultry in the Packing House*, just issued by the bureau of chemistry of the United States Department of Agriculture. Since the fleshing of poultry has become a large industry in the United States, information of the kind contained in this bulletin should be of a great deal of value.

The results obtained in the experiments reported in this bulletin show that a great variety of feeds can be used in fattening broilers, springs, roasters and hens, a fortunate situation since it permits the feeder to adapt his ration to market conditions by taking advantage of special prices of certain feeds and also to use feeds available locally. A growing bird, such as a broiler or spring, requires a different ration than a mature hen, which changes most of her feed into fat. A simple ration of corn meal and buttermilk is about as good as any for hens. Broilers fed rations containing protein concentrates, such as peanut meal, coconut oil, soy-bean meal, or meat scrap made appreciably better gains than those fed on corn meal and buttermilk. They grow rapidly and need tissue-forming feeds. Springs also respond readily to rations containing protein concentrates.

Throughout the 14-day feeding period broilers continued to gain well, which shows that this is not too long a feeding period. Springs grew very rapidly during the first 11 days, but not so rapidly, though profitably, during the remaining three days. Roasters gained well during the first two four-day periods, but not so well the last six days. It was found that the practice of feeding hens only six to eight days is well founded. The dressing and chilling shrinkage of hens, however, was much less than in the case of broilers, springs and roasters. Any of the ordinary cereal grains

Young Plymouth Rock Broiler.

supply the necessary carbohydrates and fats. More care is needed in selecting feeds for protein, salts and vitamins. The proteins of the cereal grains are present in too small amounts and are of too poor quality to produce the best results in broilers and springs unless other protein concentrates are added. Milk and cereals make one of the most profitable rations, as milk supplies mineral substances, vitamins and very valuable proteins. The results given in the bulletin show that peanut meal protein, as well as soy-bean meal protein, is especially valuable. The proteins of buttermilk are especially valuable, and if used in sufficiently large amounts produce very desirable results. Other protein concentrates are meat and fish scraps, cottonseed meal, coconut meal and sesame-seed meal.

Corn, wheat, oats and other grains lack such mineral substances as calcium, sodium and chlorine which growing animals require. In the rations where buttermilk or skim milk is used, these ingredients are fairly well supplied. Milk also supplies vitamins. At present the milk available for poultry-fattening purposes is largely buttermilk, fresh, condensed or powdered.

Those interested in the fleshing of poultry may get this bulletin by addressing the Department of Agriculture at Washington, D. C.

## POULTRY NOTES

Hatch chicks early. They make the good winter layers.

Baby chicks should be encouraged to eat as much bulk as possible.

One of the best animal foods, both to induce egg production and promote growth, is cut fresh bone.

Cold, damp land is no place for poultry; that which dries soonest after a rain is the best land on which to raise fowls.

Wheat bran is especially valuable for feathering out the baby chicks, and, properly used, it will grow feathers faster than anything else. It is advisable to keep it in the dry form before the chicks all the time.

## NEWS REVIEW OF CURRENT EVENTS

### Railway Shopmen Taking Strike Vote Because Their Pay Is Cut \$60,000,000.

### WALKOUT MAY BE AVOIDED

Supreme Court Deals Organized Labor Severe Blow—France's Refusal to Reduce Reparations Blocks German Loan Plans—Radical Republicans Win Victory in Iowa Primary Election.

By EDWARD W. PICKARD

ABOUT \$60,000,000 having been lopped off their yearly pay by the federal railway labor board, the railroad shopmen are taking a vote returnable on June 30, on the question of accepting the reduction or going on strike. The maintenance of way men, whose annual wages were cut some \$50,000,000, also are taking a strike vote.

Thus, apparently, the country faces a strike, probably effective in the middle of July, that might come near to tying up its rail transportation. But there is hope that it will not eventuate. An affirmative strike vote and an actual strike are different things, and the vote is but seldom used only as a weapon in the hands of union officials in negotiating. Railroad executives profess to believe that the men will not even vote to strike. A committee of six rail presidents issued the following statement:

"There is no talk of strike among the men," the statement says. "The disturbing statements are prepared by leaders of the unions, whose viewpoint has been distorted by months of efforts before the board to resist the inevitable downward trend of wages. The employees are in the main sincerely interested in taking care of their jobs and their homes, and few employees in any industry have more good reasons for doing so."

"The records show that the proposed scale of wages for the classes of employees involved in the two wage reduction orders already issued practically would restore the scale in effect at the end of federal control in 1920, which carried an increase for these employees of 119 per cent over the wages paid in 1916. The cost of living, as shown by the Department of Labor for March, 1922, was 42 per cent above 1916."

On the other hand, B. M. Jewell, head of the railroad employees' department of the American Federation of Labor, says: "The new wages do not permit a minimum living wage, and they are wholly at variance with the saving wage championed by President Harding and Secretary of Labor Davis." Mr. Jewell and other union chiefs who were in conference in Cincinnati predicted that unions with a membership of 1,200,000 would vote to strike.

Just as in the last previous wage decision by the board, the three labor members dissented, and this time they were especially vigorous in their dissenting opinion.

While the rulings of the railway labor board are professedly being made quite without regard to the rulings of the interstate commerce committee in the matter of rates, the two cannot be disconnected in the public mind, and the railway executives also couple them, naturally.

UNION labor received what it considers another body blow last week in the decision of the United States Supreme court in the Colorado coal mine case. The United Mine Workers of America and certain individuals had appealed from a decision by the United States District court of Arkansas, approved by the Circuit Court of Appeals, holding them guilty of violating the Sherman antitrust act during a strike in 1914, and imposing damages of \$200,000, which was trebled under the antitrust law. The opinion of the United States Su-

preme court, read by Chief Justice Taft, in effect sets aside the damages, finding the acts which caused the destruction of property were not incited for the purpose of restraining interstate commerce. But the court also held that labor organizations, even though not incorporated, are not only suable, but are amenable to the Sherman antitrust law, and under it may be prosecuted for restraint of interstate commerce.

Samuel Gompers, as might be expected, denounced this decision bitterly, saying that it set a precedent under which capital "can impose any condition on the working people of the country, and they would not dare resist." He declared he believed congress and the people of the United States would repudiate the ruling, and continued: "The court has, for the first time in the history of federal legislation, laid down the principle that a voluntary corporation is liable for damages by any act of one or a group of its members, no matter how far unrelated they may be in distance or supervision."

Unless it is nullified by congressional legislation, this decision of the highest court in the land will powerfully and widely affect the future relations of union organizations with employers and with the general public.

BRITISH, Italian and Belgian members of the reparations commission voted to enlarge the international committee of bankers that was trying to adjust Germany's financial affairs and to permit it to make its own inquiry into Germany's capacity to pay, ignoring the London schedule. America's unofficial delegate, Roland W. Boyden, though he could not vote, stated that he considered the reparations demanded—\$33,000,000,000—to be too high. France's representative, however, voted in the negative. This created a tense situation, for although a unanimous vote is necessary for the reparations commission to reduce the sum demanded from Germany, until 1926 only a majority vote is needed to give Germany a partial or full moratorium.

The bankers, recognizing that unanimity does not exist among the nations that would be expected to participate in the immense loans they were planning for Germany, decided to give up all idea of an international loan, and so reported to the reparations commission.

Premier Poincare and President Millerand—who, it may be said, are backed up completely by their government—asked a special meeting of the commission, and to it the statement was made that France denied the right of other allies to reduce the French claim on Germany since the amount of reparations has been fixed and apportioned; and that the French government would not consider reduction of the reparations unless the war debts were reduced proportionately. The latter proposition, of course, would put the matter up to the United States, which up to the present has shown no disposition to scale down the vast amounts owed her by other nations. Meanwhile there hangs over Europe the menace of independent action by France against Germany.

EXASPERATED by the continual and increasing warfare in Ireland between the Sinn Feiners and the Ulster folk, the British government has undertaken to resume control of the situation. Large reinforcements were sent to the troops already in the island and vigorous attacks were made on the republicans who infested the border and regions adjacent. The British used airplanes and small war vessels with telling effect. The Free State leaders and the British government are discussing changes in the Irish constitution which the latter demands, and both sides are awaiting the Dail elections, which come on June 16. It has been surmised that the De Valera faction might win more seats because of the bitter feeling aroused by the fighting, and indeed it was intimated that the fighting was instigated for that purpose.

SOVIET Russia, having failed to frighten the rest of the world into giving it large credits, has resumed its old uncompromising attitude. Foreign Minister Tchitcherin, who says he is not going to the conference at The Hague, declares Russia will not

recede one step from its May 11 memorandum, which disrupted the Genoa confab. It will make no more concessions, he asserts, and rejects America's demands for additional guarantees as the price of recognition. He said America would recognize the futility of her policy, and then launched into an attack on Charles R. Crane and others whom he accused of assisting the counter-revolutionary movements.

Persistent reports come from places near Russia to the effect that Premier Lenin is a desperately sick man. His physicians have issued a bulletin stating that he suffered an acute attack of gastritis, which affected his nerves and heart, but that he is now well on the road to recovery.

THE cabinet in Japan has resigned, owing to opposition in the parliament. But the privy council has decided that this does not affect the treaties and agreements signed at the Washington conference, these being international in character and outside the sphere affected by a cabinet change.

ALEXANDER, king of Yugoslavia, and Princess Marie of Romania were married Thursday in Belgrade in the presence of representatives of nearly every nation in the world. The affair was marked by all the splendor and display of medieval times and the ceremony in the ancient Byzantine cathedral was followed by a great procession of quaintly clad deputations from the provinces, with wonderful floats and pageants. Ordinarily the marriage of royal personages excites only passing interest in these days, but this one is of more importance in that by it are linked the dynasties of three Balkan countries. It serves to strengthen the little entente, and possibly to lessen the danger of future wars in that long turbulent part of the old world.

PROGRESSIVES in the Republican party scored another victory last week in the nomination of Col. Smith W. Brookhart for United States senator from Iowa. Really this was a triumph for the radicals, for Brookhart is rated as more than a progressive. He is a former soldier and a lawyer, residing in Washington, Ia. It was necessary for him to obtain 35 per cent of the primary vote to obtain the nomination independent of the state convention. He got 41 per cent. Chairman McCormick of the Republican senatorial campaign committee says the committee "will join the national committee and the Republican state committee in Iowa to assure the election of Colonel Brookhart. Colonel Brookhart bears the reputation of a citizen of high purpose and high courage and had a fine record of service during the war."

AT LAST the senate has before it the soldiers' bonus bill, as drafted by the finance committee. Chairman McCumber's accompanying report placed the probable cost to the federal government at \$3,845,050,481, spread over a period of 43 years from next January 1. The estimate is based on the theory that 75 per cent of the 4,458,190 veterans who would be eligible for compensation would elect the adjusted service certificate option; 22½ per cent farm, home and land settlement aid; and 2½ per cent vocational training aid.

With reference to financing the legislation, Senator McCumber's report said it was hoped that the reduction in governmental expenditures plus the payment of interest on the refunded foreign obligations would be sufficient to obviate the imposition of additional taxation.

LILLIAN RUSSELL—Mrs. Alexander P. Moore of Pittsburgh—is dead. For years she was the typical American stage beauty, but she was more than that. She was a first rate light opera singer, the helpful and beloved friend of many in and out of her profession, a good newspaper writer and a devoted and hard working patriot in time of war. In recognition of her services to the country during the war she was buried with military honors, and a detachment of marines stood watch over her casket, since she held the rating of gunnery sergeant in the United States navy. One of the most gracious figures in American life thus has passed away.

## Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be dependent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

### His Attitude.

"You don't believe in spirits?" "Not the kind I read about," said Mr. Grumpson. "I don't take any stock in table rapping, the rattling of tambourines and mysterious noises issuing from a cabinet in a darkened room. When spirits are willing to give a demonstration in a public square at high noon I'll be there with an open mind."—Birmingham Age-Herald.

The charm of a bathroom is its spotlessness. By the use of Red Cross Ball Blue, all cloths and towels retain their whiteness until worn out.—Advertisement.

Mrs. Mable Hopkins and children visited Mrs. Lura Sutton Saturday.

Miss Virgie Stenbridge visited Mrs. Alma McConnell one day last week.

Mr. and Mrs. Roy Joyce visited Mr. and Mrs. Lester Corley Sunday.

Mr. and Mrs. T. Hunt and children visited J. W. Tosh and family Sunday.

### Will Impersonate Literary Notables at Chautauqua Here

Mark Twain, Longfellow, Riley, Hugo and other literary masters will live again in the impersonative lecture-recital to be presented by Sidney Landon, humorist, scholar and interpreter, at the coming Redpath Chautauqua.

With the aid of wigs, grease paint and vivid descriptions, Mr. Landon presents character studies and speaking

SIDNEY LANDON

likenesses of a number of the best-loved men of letters; and while in make-up, he reads from their best-known masterpieces.

One of Mr. Landon's favorite impersonations is of Mark Twain as that famous humorist appeared on the occasion of his seventieth birthday anniversary banquet. Poe and Bill Nye, Tennyson and Kipling also appear in the Landon gallery of impersonative portraits.

The Landon lecture-recital is inspirational, educational and entertaining.

**JUNE 26 to JULY 3**

Crittenden County Court  
Commonwealth of Kentucky  
By V. O. Chandler, Sheriff, Pltiff.  
vs. John C. Angell, Assignee Bell &  
Heath Mountain Coal Mining Co.,  
Defendant.

By virtue of a judgment rendered in the above styled action I will on Monday the 10th day of July 1922 between the hours of 10 A. M. and 2 P. M. at the front door of the Court House in Marion, Crittenden County, Kentucky, expose for sale to the highest and best bidder for cash the following described property or so much as may be necessary to satisfy the amount of taxes, penalties, Suit and Costs assessed against said property and costs amounting to the sum of \$85.60.

The minerals and right to mine the same in and under the following described tract of land conveyed to the Bell and Heath Mountain Coal Mining Company by Caroline M. Carville on the 1st day of Sept. 1866 by deed of record in Deed Book H on page 328 in Crittenden County Court Clerk's office and described as follows:

**FIRST TRACT:** Beginning at a black oak, William Newcom's second corner running thence N. 6 W. 101 poles to an ash, elm and hickory on the bank of Tradewater river, said Peter Casey's upper corner of Survey No. 39; thence S. 70 E. 212 poles to an elm on the bank of a branch on Dudley Newcom's corner, thence S. 80 W. 28 poles up the branch to a sweet gum on the bank of the branch; thence S. 57, 30' W. 16 poles to an elm and sweet gum up the branch above the road passing from Salem to Morganfield, Kentucky; thence S. 17 W. 26 poles to a hickory near the fence of and a corner to William Newcom, Thence N. 78 W. 146 poles to the beginning containing 100 acres.

**SECOND TRACT** Being the same conveyed to W. C. Carville on 13th of Sept., 1859 by Thos F. Newcom and wife and bounded as follows: beginning on a black oak and running thence North 176 poles to a stake in line of original survey thence West 40 poles to a post oak, thence S. 21 W. 120 poles to a black gum; thence S. 15, E 30 poles to a black oak; thence S. 70 E. 82 poles to the beginning containing 74 acres more or less.

**THIRD TRACT:** Conveyed by R. B. Young and wife to W. C. Carville on 15th day of March 1857 and bounded as follows: Beginning on a hickory, lower corner to John Snodgrass, running thence West 200 poles to a post oak; thence North 160 poles to a hickory and dogwood; thence East 160 poles to an elm on the bank of the river; thence with the meanderings of the river, namely Tradewater, to the beginning containing 200 acres more or less.

V. O. CHANDLER, Ex- S. C. C.

## Hail Insurance Rates Reduced on Tobacco

With the recent reductions of hail storm insurance rates on growing tobacco, in the face of the enormous losses to growers within the last four or five years, every grower can afford to protect himself to the limit and, with safety, go into the business of producing a crop that requires so much money, time and labor, as does tobacco, that should be insured against loss by hail storms.

Now that so many growers have gone into an organization for a more economical, business-like way of handling their crops, and the insurance companies have so lowered rates on hail insurance, there is no reason in the world for any grower to neglect the protection of his crop by ample insurance.

Better see your insurance agent right away and have him protect your crop, which is likely to be destroyed any day by a hail storm. Policies become effective noon, July 10th.

## What Squire Jim Wanted

By MARTHA M. WILLIAMS

© 1922, by McClure Newspaper Syndicate.

If you know the thing you want, there's always the chance of getting it by hook or crook or old chance. But if you don't know—well, there is quite another story, as Squire Jim Lewis, poor gentleman, was to prove. He did not lack either possession or occupation. Contrariwise, he suffered an embarrassment of riches—a big farm, full-stocked with the best of everything that walked, wallowed, flew and ate, a fine substantial house, cram-full of plenishings as fine, a good name, money in bank and expectations. There did seem nothing left a reasonable man to sigh for.

Yet—there was. Just what, he did not know, acutely as he was conscious of a dully aching void. Aunt Keziah, who kept house for him, said shrewdly she didn't know what Jimmy needed wust—to get a wife or religion. Religion would be safest—you could always shake aside if the collar galled—and there you were. Divorces cost money—besides, folks remembered them so long. Worst risk, though, was of things not going that far. S'pose Jimmy tied up with a woman who tried to make him eat by the books—cold bread and health-truck for breakfast—and no pie whatever, no time at all?

It galled Jimmy, even grieved him, this puzzle with no answer. The answer was not a woman—that was the surest thing he knew. Notwithstanding, he was no woman-hater, rather one who cherished a vast, vague respect for the whole sex—so vast and vague it chilled warmer feelings.

Athwart this bewilderment flashed, rainbow wise, a human rainbow, by name Lyle Grayson. Not in any safe, conventional way, either, but by the conjunction of deep mud, a stalled car and a perfectly beautiful young man—so beautifully spotless he seemed out of place, packing a glass shade for protection. Titularly he was driving, but the girl beside him had evidently been doing the real work. Her nose was smudged, one bare wrist deeply scratched, her eyes pools of adoration mixed with concern. She hailed Squire Jim alertly at sight, asking help in the first words. Need of it was too clear to require explanation. "Come here and make this car go through your red mud," she all but demanded. "It's—It's new to us; we're strangers, you know."

"Honeycombers," the squire was somehow bold enough to answer. The girl smiled deliciously, saying with frank pleasure: "Not yet, but soon—provided you get us out."

"Pretty deep," the rescuer commented, dismounting at the edge of the puddle. "If you had drove spang through the middle you might a-made it safe—it's deepest and stickiest by that far bank."

"Never mind about that—the thing is to get through it—somehow," the girl said, impatiently. "We are quite helpless. Arthur—my fiancé—never tried to elope nor run a car until this morning."

"He ought to be game for wadin' in red mud," Squire Jim commented. "I won't let him," Lyle said sweetly. "He hasn't any other clothes along—you don't think he wants to be married looking like a hod-carrier?"

"Wouldn't care how I looked—if I got my girl," Squire Jim countered, thereby amazing himself. Somehow this girl had melted things inside—he had lost his sense of futility—life was no longer sapless, but teeming with high adventure. He was in mud half-thigh deep, in spite of wearing his second best suit. But that didn't matter—nothing mattered except to hear further that bewitching voice. It said: "Oh, thank you so much!" as she stopped to test the full depth and stiffness of the mud. "Lightening loads the only chance," he said, looking up. "Hand out your traps—I'll take 'em to dry land—then come back for you."

"Oh, we can never get out of the car," Lyle exclaimed in dismay. "At least I can't—have to drive, you know. But if you think you can manage with Arthur—not let him fall—" there she stopped perforce—the squire had somehow yanked her from her seat, and was carrying her over to the firm roadside. As he sat her down he said, masterfully over his shoulder: "Arthur, be ready—long time I reckon since you rode pick-a-back." Arthur rose up, outblushing the reddest rose, made as though to plunge in the mud, but stopped short at his sweetheart's cry: "If you do that all is off between us."

So there was excuse for the ride he took, wishing the while he might strangle his steed. But as his feet touched earth a new terror beset him—over the hedge, half flying, hat awry, burst a tall, muscular woman, her eyes stormy, but her cheeks stained with tears. She had seen the transfer of Arthur. Instantly she clutched him, crying loudly, "I am in time, thank God. I turned back, finding you had not reached the minister. Heaven guided me across fields to find and save you."

"Here, I want the straight of this!" Squire Jim demanded. Holding Arthur tight, the newcomer answered: "The straight is—merely that I am saving my son from an adventures. She ran off with him in her car this morning. By help of providence I have foiled her. My boy is under age. She shall not ruin his life. I had rather see him dead than her husband. You are, I suppose, her tool."

"Not so you'd notice it," was the retort. "Never saw either of the two till half an hour back. But if I'm a judge of small matters, she," nodding at Lyle, "is the luckiest one. Can't think how she ever took a shine to Arthur—unless she's so young she still hankers after toys." Arthur tried to spring at the squire's throat—majestic mamma restrained him, saying: "We will not stay here to bandy words with a ruffian. Come, my son—I left the car a little way back on the main road. I do hope you left nothing of value in that car," glancing scornfully at the stalled roadster. "We will not, however, stop to investigate—even though you should have lost your purse."

"I have the license—if that's what you're concerned about," Lyle cried, springing to her feet. She had crouched, cowering upon the grass-bank—now she faced Arthur, mute but with entreating eyes. He could not meet their gaze—turning, he muttered something that sounded like: "We must wait;" then went dutifully along with his natural protector. Lyle watched them disappear, the entreaty dying slowly from her glance. When they had vanished she turned to Squire Jim, trying to laugh and speak saucily—but broke down utterly and flung herself prone upon the grass, her body shaken pitifully with hard, dry sobs. He let her be for five minutes, busying himself the while with the car. Empty, he managed to drive it clear and halt it some little distance beyond its owner.

She sat up at the sound of it, her face burning, and said breathlessly: "I want to get away—to hide from all the world. Tell me where to go."

"Instead, I'll show you," said Squire Jim, handing her into the car. It took them miles on miles till in early afternoon it halted in front of a peaceful gray house, neither big nor little, with flowers in the yard, a gray cat on the steps, and a pretty faded woman rocking on the porch. To her Squire Jim said unsteadily: "Mary—I know what I want—you. This child has shown me a woman's worth. She is hurt—I've brought her to you for shelter and healing. Will you help to pay what we owe her?"

Very tenderly Mary Elliott murmured: "Yes."

## TO EXTREMES IN PHILOSOPHY

Greek Sages Held Widely Different Views Concerning Life and All Connected Therewith.

Heraclitus, "the naturalist," a Greek sage of Ephesus, who lived about 500, B. C., was called the "weeping philosopher" because of the grim solemnity of his bearing and the utter hopelessness of his views of human life. He was, in fact, a champion pessimist. "He was the first to note," says James Wood, "how everything throughout the universe is in constant flux, and nothing permanent but in transition, from being to nothing and from nothing to being; from life to death and from death to life; that nothing is; that everything becomes; that the truth of being is becoming; that no one, nothing, is exempt from this law, the law symbolized by the fable of the Phoenix in the fire." "The Laughing Philosopher" was a name given to the Greek sage, Democritus of Abdera, in Thrace, who lived between 460 and 357, B. C., because of his satire at the expense of the human race. He showed much flippancy in discussing human life and viewed with supreme contempt the aspirations of man. "He laughed or jeered at the feeble powers of man," says Dr. Brewer, "so wholly in the powers of fate that nothing he did or said was uncontrolled." This ancient philosopher advanced a theory of the formation of the universe by atoms in motion, which was later developed by Epicurus and Lucretius.

## Portia's Grab Settled.

What shall Portia wear when she is called to the English bar? Five learned judges have been puzzling over the question and have decided that she shall wear just what her brother barristers in England do. There is a safety clause in the decision, however, for it has been decreed that their gowns shall be plain black or very dark, to prevent the appearance of a woman barrister in mauve or pink, and also that skirts are to be "no shorter than the gown." The ordinary wig, which completely conceals the hair, is to be worn so that the task of ascertaining whether counsel is he or she may at times become a little bit complicated.

## Old-Time Buildings.

Lanciani, the archeologist, has shown that in the Rome of the Caesars trouble was experienced with high buildings. A law was passed restricting the height of fronts to 90 feet. In order to evade it, builders adopted the practice of carrying up the rear portions several stories more. Other laws bearing on the heights of buildings were passed in old times. There was a tendency to diminish the height of stories as the buildings increased in size, and a height of 130 feet was probably attained. It is believed that the ceilings were so low that a man could not stand upright in the rooms.

## Utilitarian.

"There appears to be no longer a place in politics for the silver-tongued orator," "No," replied Senator Sorghum; "people have developed great commercial discernment these days. They see no reason why a man should waste impassioned eloquence when he isn't trying to sell something."

## IMPROVEMENT OF DAIRY INDUSTRY AIMED AT BY RECENT CONFERENCE

There is a Decided Need for Improvement in Dairy Animals and in Making the Best Use of Those Now Available.

(Prepared by the United States Department of Agriculture.)

As a result of the conference of representatives of the purebred dairy cattle associations held in Washington, May 5, at the call of Dr. C. W. Larson, chief of the dairy division of the United States Department of Agriculture, a number of important recommendations were made for the improvement of the dairy industry, especially the purebred dairy cattle business. Each of the breed associations, including the Ayrshire, Brown Swiss, Guernsey, Holstein-Friesian, and Jersey, was represented by two or more delegates. The subjects of discussion had to do with the improvement of dairy cattle, advanced registry, fairs, and sales.

No conferences of this kind had been held for several years, and the representatives expressed the desire that this one might result in the formation of a permanent organization to thresh out problems of mutual interest and to work for the general betterment of the industry. Figures prepared by the department showed a decided need for improvement in dairy animals and in making the best use of the improved animals that are now available. The average production of the cows of the United States is about 4,000 pounds of milk and 160 pounds of butterfat a year, while the average cow in some other countries produces almost twice as much. There are 30 million grade and scrub dairy animals in the country and less than a million purebreds. There are 4,560,000 American farms having dairy cattle, and only 208,251 of these farms have purebred dairy cattle. It is estimated that approximately 250,000 purebred dairy bull calves born each year are not needed on the farms where purebreds are kept. Of the purebred animals that were registered last year, about 150,000 were females and less than 75,000 males, which indicates that not half of the purebred dairy bulls are registered.

## Recommend Better Sires.

Among the recommendations made by the conference were those expressing approval of plans for increasing the use of purebred bulls in scrub and grade herds, and of the plans for co-operative bull associations as being the best known means for distributing surplus bulls and introducing them into new territory. Although there is a place in this country for all the purebred dairy cattle that may be produced for some time, it was the consensus of opinion that an expert business in purebreds would help to stimulate interest among farmers at home.

A number of questions related to advanced registry were brought up. Co-ordination of effort by and between the agricultural colleges and the breed associations was suggested, and it was recommended that these organizations and institutions make special efforts to co-operate. In this connection it was suggested that the various representatives ask their associations at their earliest meetings to appoint committees to meet with the Dairy Science association to see if an improved plan for making official tests of cows can be worked out, which will be agreeable to the breeders, the associations, and the colleges that send out the official testers.

The showing of dairy animals at fairs and expositions received a good deal of attention from several angles. It was decided to recommend to the associations that they cease giving money prizes at these shows, but spend the funds in putting on educational exhibits; that more attention should be given to production records in awarding prizes at fairs and shows; that the associations represented should give more attention to educational exhibits showing the economic advantage of purebreds in dairy practice; that each association has a distinct duty in connection with the selection of suitable persons to act as judges of the various breeds of dairy cattle at fairs and shows; that no animals should be admitted to fairs and expositions unless they are from herds accredited as being free of tuberculosis or in herds under federal or state supervision, and that fairs not enforcing such a rule should not be favored with animals for exhibits.

## Live Stock Sales Discussed.

Questions relating to private and public sales were discussed, and it was decided to suggest a meeting at an early date of all the dairy cattle associations with a view to drafting a code of ethics for sales that would eliminate some of the undesirable conditions. Since an excessive amount of attention is given to a few high prices to the neglect of average conditions, it was also agreed to recommend to the associations that they send in to the bureau of markets and crop estimates of the department regular re-

ports of prices paid for purebred dairy cattle.

The representatives were well pleased with the accomplishments of the conference and were in favor of holding similar ones at frequent intervals. During their stay in Washington they were received by President Harding and were addressed by Secretary of Agriculture Wallace. Dr. John B. Mohler, chief of the bureau of animal industry, attended the meetings and addressed the conference. A part of the second day was spent in a visit to the department's farm at Beltsville, Maryland.

The list of associations and their representatives taking part in the conference is as follows:

Ayrshire Breeders' association: Paul O. Reymann, president, West Virginia; C. L. Burlingham, secretary, Vermont.

Brown Swiss Cattle Breeders' association: A. E. Bower, president, Ohio; L. E. Hull, Ohio.

American Guernsey Cattle club: Robert Seville, president, New York; S. M. Shoemaker, Maryland; Karl B. Musser, New Hampshire.

Holstein-Friesian Association of America: Fred Palst, Wisconsin; H. W. Norton, Jr., Michigan; D. D. Atken, Michigan.

American Jersey Cattle club: M. D. Muua, president, Minnesota; R. M. Gow, secretary, New York; O. H. Baker, New York; C. J. Tucker, Missouri.

## REFILLING SACKS IS PROHIBITED BY LAW

Food and Drugs Act Is Violated by Some Feed Dealers.

Federal Officers Have Been Instructed to Watch for Interstate Shipments of Feeds Adulterated or Misbranded.

(Prepared by the United States Department of Agriculture.)

Some feed dealers are refilling used feed sacks stamped or printed with the name of the manufacturer and the brand name of the feed that was originally in the sack, so that the names and brands are not true in reference to the feed in the sack after refilling, according to officials of the bureau of chemistry, United States Department of Agriculture, who are charged with the enforcement of the Food and Drugs act.

A feed dealer of Iowa was recently cited to a hearing under the Federal Food and Drugs act for shipping into interstate commerce a molasses feed in bags which he had refilled but which bore the name of another feed manufacturer. The sacks also bore a brand name under which the original owner of the sacks sold a stock feed of much higher grade than the feed with which the sacks were refilled.

The Federal Food and Drugs act does not require the name of the manufacturer or the brand name to appear on sacks of feed coming within its jurisdiction, according to officials of the bureau, but if the name of the manufacturer and brand are given on the sack they must be true. The Food and Drugs act prohibits the use of any statements on foods or feeds that are false or misleading in any particular.

A dealer who contemplates refilling used feed sacks on which is printed the name of another manufacturer or any statements that are not correct when applied to the product he uses in refilling the sacks should be very careful to see that all such statements are obliterated.

Inspectors have been instructed to look out for interstate shipments of stock feeds which are adulterated or misbranded in this or any other particular. Appropriate action will be taken in all cases found to be in violation of the law, it is said.

## BEEES PLAY IMPORTANT PART

Especially Valuable to Orchard Owner During Rainy Season in the Blooming Period.

Bees play an important part in the production of fruit in cross pollinating and fertilizing the flowers. They carry and distribute pollen. Prof. W. A. Price, entomologist at Purdue, says bees are especially important to the orchard owner in rainy, backward seasons, during the blooming period. When it is rainy the flies, butterflies, and the wind, pollinating agents, may not function, but the bees work between showers and are often responsible for the success of the fruit crop.

Had Your Iron Today?

## Never Mind—Re-vitalize

YOU BET it's warm—the more you need then for keeping the vitality up to par.

Vital men resist heat easily. Languid ones are floored. Re-vitalize yourself and you won't mind the weather.

Get new energy in little raisins.

1560 calories of energizing nutriment per pound in Little Sun-Maids. 75 per cent pure fruit sugar.

Wonderful because this sugar doesn't need, and, therefore, doesn't tax digestion and thus heat the blood. Yet energizes almost immediately.

Contain fatigue-resisting food-iron also. Try a box today.

All at the Same Time

Perhaps. Maybe the reason so many women insist upon eating things that disagree with them is because they love an argument so.

Children's handkerchiefs often look hopeless when they come to the laundry. Wash with good soap, rinse in water blued with Red Cross Ball Blue.—Advertisement.

It is easier to join the mob than to argue with it.

Of Course, Unintentional. Joe—Sweets to the sweet? Nephew—Oh, thank you; may I pass you the nuts?—Goblin.

Dr. Perry's "Dead Shot" is powerful but safe. 25 years of success has proved it. With one single dose, Worms or Tapeworm can be expelled from the system, and no matter old or other parasites should be used in addition. Money back if not satisfied.—Advertisement.

Self-Protection. "Why did you brag so on Fred's rotten home-brew?" "I had to; I gave him the recipe!"—Judge.

EACH IS A GENUINE GOODYEAR

Each of the two tires illustrated above is a genuine Goodyear through and through.

One is the famous reliable 30 x 3 1/2 inch Goodyear All-Weather Tread Clincher.

Its companion is the popular 30 x 3 1/2 inch Goodyear Cross Rib.

The Goodyear Cross Rib is built of the same high grade Egyptian cotton fabric that goes into the All-Weather Tread Goodyear.

It has a long-wearing but differently designed tread, and sells for less money.

More than 5,000,000 of these tires have been sold in the last five years.

Their fine performance has demonstrated the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer about their advantages.

## VACUUM TUBE USED AS RADIO DETECTOR

How This Device Depends on Emission and Control of Electrons for Its Operation.

Readers of the radio column are urged to clip each article and paste it in a file book. The articles printed are continuous and the entire series will be valuable for reference.

The greatest advances made in the past few years in the radio art have been due in one way or another to the use of vacuum tubes. In view of this fact a more careful consideration of them will be of interest.

All of these tubes, known by a variety of names, such as radiotron, audion, seriotron (trade names of the manufacturer) depend upon the same fundamental principles for their operation. For the sake of simplicity of brevity these will be referred to in this column simply as vacuum tubes. A vacuum tube can be made to function as a detector, as an amplifier, or as an oscillator.

The vacuum tube depends on the emission and control of electrons for its operation. The electron is the smallest subdivision of matter which mankind recognizes and it carries the smallest known charge of negative electricity. For years previous to electron research it had been held by scientists that matter was built up of distinct particles or units which they called atoms and molecules. At first the molecule was assumed to be the smallest quantity of matter that could have a separate existence or take part in chemical action, but more vigorous research pointed to the fact that the molecule is made up of still smaller elements which are termed atoms; that is, a molecule may be composed of several atoms. Then for a time it was assumed that the atom was the very smallest quantity of an element that could exist, but later researches have revealed that atoms may be further subdivided into particles

called electrons. The apparent mass of an electron is about one-eighteenth-hundredth part of that of an atom of hydrogen which is the smallest of the chemical atoms.

According to the electron theory an atom consists of a definite number of electrons grouped around a nucleus having a positive charge and so long as none of the component electrons are driven from the atom, the latter possesses no detectable charge. The positive charge on the nucleus is said to be exactly neutralized by the negative charges on the electrons grouped about it.

Suppose now that by some means an electron can be detached from the atom. Then the atom becomes what is known as a positive ion and it exhibits the properties of a positively charged body, or in other words since an electron which carries a negative charge has been removed from the atom which has equal positive and negative charges, the portion of the atom now remaining has a deficiency of negative charge and acts like any positively charged body.

On the other hand if some force can be brought to bear that will add an electron to a normal atom which is neutral as far as electrical charges are measured, the result will be a negative ion, which will possess all the properties of a negatively charged body. An atom then which has a deficiency of electrons is called a positive ion and one having excess of electrons is called a negative ion.

Since each electron carries a negative charge of electricity an electron represents a certain quantity of electricity. Forcing electrons to move from one point to another causes electricity to flow. The ability of any medium to conduct electricity or allow a current to flow through it depends upon the number of free electrons available as carriers of charges.

It has been known for many years that the space surrounding a piece of heated metal is a conductor of electricity. It has been demonstrated more recently that this is due to the release of electrons and that if an incandescent metal be placed in a bulb exhausted of all gases, pure electrons will be liberated from the incandescent metal.

In a vacuum tube such as we are using at the present time, the piece of metal used to furnish the electrons is called the filament and is usually made of tungsten and sometimes is coated with oxides to increase the electron emission. For convenience the filament of a vacuum tube is heat-

ed by a battery current and it is this heat furnished by the battery current that constitutes the force that disrupts the atoms of the filament and liberates electrons.

Fig. III is a spherical glass bulb from which all the air and gases have been exhausted and having mounted in it a filament C-D which can be heated to incandescence by the "A" battery connected to it, and the metallic plate E. When the filament C-D is heated to incandescence by the "A" battery connected across its terminals electrons are emitted. Connecting the cold plate E to the incandescent filament C-D by means of the circuit E-F-G-H which includes a current meter and a "B" battery, with its negative side connected to the filament lead at H and its positive side connected through the current meter, the plate becomes electrically positive with respect to the filament.

Since like charges repel and unlike charges attract, there will be a movement of electrons from the filament to the positively charged plate, and the current meter will show a deflection which indicates that a current is flowing in the circuit E-F-G-H.

Increasing the "B" battery voltage causes an increase in the current flowing in the circuit E-F-G-H. The plate circuit, until the positive charge on the plate E is so strong that all of the electrons given off by the filament are attracted to it. Assuming that the temperature of the filament is kept constant and that the plate voltage has been increased to the point where all of the electrons given off by the filament are attracted to it, any further increases in the "B" battery voltage will not cause any increase in the current in the plate circuit.

Increasing the temperature of the filament will increase the total number of the electrons emitted.

### FRISCO TALKS TO HONOLULU

New Radio Station at the Presidio Can Be Heard Half Way Around the Globe.

"Hello, Honolulu."

That may sound like fiction, but it is a reality, nevertheless. The new radio station at the Presidio, San Francisco, with aerial conditions right, can be heard half way around the globe. Officials in charge of construction declare it to be the most powerful vacuum tube transmitter on the Pacific coast.

Located on the highest point in the Presidio, overlooking San Francisco bay, two 150-foot aerial towers to augment its efficiency, the new station will command similar stations in Salt Lake City and Cheyenne.

### Radiophones on German Trains.

Wireless telephone instruments will be installed on a number of important German express trains, and receiving instruments will be placed in hotels and embassies, according to an announcement made recently. Experiments conducted in a moving freight car have shown that the wireless system works well, the men engaged in the testing of the instruments being able to hold conversations with friends in Berlin. The tests were made under the observation of engineers, military attaches and the diplomatic representatives of the United States and Sweden.

### Handling Vacuum Tubes.

When you handle the vacuum tubes of your receiver great care should be exercised that they are not knocked about or that the elements are broken. These little lamps are the heart and soul of the set. A good way to operate these tubes is to keep the glow just a little below the critical point.

### ADVICE FOR AMATEURS.

The voltages applied to the plate circuits of amplifying tubes are not extremely critical and one voltage control will suffice. The detector tube, however, is often very critical and an efficient potentiometer will work wonders in controlling it. Apparatus used for the reception of broadcasting is exactly the same as that used for the reception of code signals. The transmitting equipment, however, is different.

The use of a single wire for reception is advantageous because it lessens the amount of objectionable interference in the way of static. It is equally as good as a multiple wire system for reception.

Defective "B" batteries will often cause roaring in the telephone receivers.

The electron often talked about is the smallest known quantity of negative electrical energy. In motion it makes up the electric current.

A "soft" vacuum tube is used as a detector tube and a "hard" vacuum tube as an amplifier. The terms "hard" and "soft" refer to degree of evacuation.

Radio waves travel at the same speed as light, namely 186,000 miles per second.

A wavemeter is an instrument used for checking up the wave lengths of sending and receiving stations.

Gas pipe or water pipe systems may be used for grounds, the latter being more advisable.

Lightning protection secured by grounding the antenna when not in use is essential and is required by the underwriters.

## The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

### REGARD FOR HEROES' WISHES

Judge Neterer of Seattle Holds Request of Soldier Killed in War Demands First Consideration.

Is the last wish of a soldier dying on the field of battle more to be respected than legal forms decked out with sealing wax? The American Legion thinks it is. Recent cases before the courts have brought the question to the front. According to Federal Judge Neterer of Seattle, the wish of a soldier killed in battle is higher law than any departmental regulation. According to this decision Agnes Claffy, sixteen-year old niece of Clarence Swank, is awarded the residue of Swank's estate, amounting to \$5,000. Swank was killed in France. Departmental red tape clutched up the case on account of the death of Swank's mother, the original beneficiary. In handing down his decision Judge Neterer cited precedents extending back to the days of Caesar and the legionnaires of ancient Rome.

The latest case is that of Miss Eleanor R. Knapp of New York, whose claim to the estate of Ernest Charlton Mason of the One Hundred and Sixth United States Infantry has been contested by Mason's uncle. In a muddy dugout before a general advance against the Germans, Mason told his buddy, Oscar Westgate, the story of his engagement, and added that he now felt that in this advance he was slated to "go West." "If I don't come through this," he said, "they started over the top, I want Eleanor to have all my estate."

Mason, among others, was cut off and captured by the Germans. They were taken to the same prison camp. For ten days, a bunkie testified, Mason lay ill on the ground with influenza. Then he was taken away in an ambulance and his death reported. Eventually a death certificate was issued by the United States government. But the attorneys for Mason's uncle contested the case to the extent of arguing that the "proof of death" was unsatisfactory.

The justice of the soldier's latest will has been upheld in startling fashion by the highest courts of England recently. An English major of infantry died alone in his lodgings in London directly after the armistice. He left no legal will. Across the front of a photograph of his fiancée he had hastily scrawled: "All to her." The case was brought before the highest tribunal of England and the "will" stood.

### TABLET GRACES LEGION SHIP

Bronze Piece in Main Dining Saloon Engraved With Dedication by National Commander.

The steamship "American Legion" of the Munson lines, sailing between New York and Buenos Aires with an American Legion crew, now bears in its main dining saloon a bronze tablet

"American Legion" Steamship Tablet.

engraved with a dedication signed by the national commander of the Legion. The formal presentation of the tablet was made in the presence of the New York and New Jersey officials of the Legion and two hundred guests.

### Send Diseased Poultry to France.

The Germans are inoculating with cholera the fowls they are delivering the French under the reparations agreements, according to French biologists. It was noticed that the poultry sent in from Germany soon died. Prompt inquiries on the dead fowls disclosed the cholera germ. The Paris Matin, one of the greatest French newspapers, calls for a government investigation.

### Pending.

"Well, want to marry my daughter, I suppose?" snapped the grouchy millionaire as he glowered at the timid youth. Adjusting his glasses he added: "By the way, aren't you one of my daughter's former suitors?" "N-o-n-o sir," faltered the cheerless one, "but I expect I soon will be."—American Legion Weekly.

## WET FEET BRING COUGHS AND COLDS

Until entirely rid of a cough or cold, look out. They are a source of danger.

Just a few doses of Pe-Ru-NA taken soon after exposure or first manifestation of trouble will usually break a cold or dispel a flu in a hurry the most persistent cough.

TABLETS OR LIQUID

KEEP IT IN THE HOUSE

## MENTHO-QUININE

### Is Pleasant to Take and Palatable

It gives the desired effect of Quinine without the ringing sensation in the head or upsetting the stomach.

Mothers will find this a favorite with the children, as it has such a pleasant taste.

Well adapted to physician's uses and is protected by the V.V. Shield Brand Label, which guarantees quality.

Your dealer will supply.

Memphis, Tenn.

### ERROR IN MODEL'S JUDGMENT WOMAN HAS HISTORIC PEN

Criticism on a Par With Some Others That Have Come Under Observation.

There is an old saying that a beautiful painting judges us, not we the painting. So in most things. Most people think they are passing judgment, when in reality their lack of real knowledge is "showing them up." Wherefore, many people keep their mouths shut most of the time.

A little knowledge may be a dangerous thing, but most to be desired. Recently a man was looking at a beautiful photograph of a modern Greek girl posed in front of the Parthenon. It was a symphony of the old and new, the glory that was Greece, to quote Poe's immortal phrase again, and the beauty that always characterizes a lovely woman.

"Isn't that a fine picture?" he asked another.

The other surveyed the photograph critically.

"Yes," he said, "She's got awful surroundings, though. What did she go up in the rocks for?"

A word is enough to the wise.

Used by President Harrison When He Signed the Present American Copyright Bill.

The recent celebration by the League of American Pen Women of their twenty-fifth anniversary, or "silver jubilee," makes this story timely.

During the administration of Benjamin Harrison, the present American copyright bill was passed. William McKinley, then a member of the house of representatives, offered the bill, the data for which was supplied by Margaret Sullivan Burke, newspaper correspondent, and afterward first president of the League of American Pen Women. She gave this league its first home and its name.

Afterward, when President Harrison signed this bill, the pen with which he signed it was presented to Mrs. Burke by Elijah Halford, his private secretary, and one of her old Indiana friends. This pen is now in the possession of her daughter, Hilda Burke.

The woman who trusts all men is shy of experience.

### SEEM TO PROVE CONNECTION

Stone Implements Found in Chile and in South Dakota Found to Be Identical.

Scientists are given something to ponder over by the assertion of Richard Franklin Pettigrew of Sioux Falls, S. D., former United States senator, upon his return to the city from a four-months' trip along the west coast of South America, that stone implements representing the stone age in Chile are exactly like a number of stone hatchets, axes and other implements recently found in the hills along the Split Rock and Big Sioux rivers, ten or fifteen miles east of Sioux Falls.

Pettigrew states that a doctor who is studying prehistoric man at Santiago, Chile, gave the implements to him. "I was intensely interested in the resemblance," said Pettigrew, "though I do not pretend to account for it. The United States ambassador sent them to the United States for me and I found them on my return to Washington."

**Grape-Nuts**  
Here's a real treasure from Nature's storehouse

**GOOD** old Mother Nature has placed in wheat and barley the wonderful food properties which build and sustain life and health.

Many so-called "refined" foods are robbed of vital elements which the body needs.

Grape-Nuts—that famous wheat and barley food—brings you all the natural goodness of the grains in perfect form, with a crispness and flavor that charm the appetite.

You will find Grape-Nuts an ideal dish for breakfast or supper-time. Ready to serve from the package, with cream or good milk.

Order Grape-Nuts from your grocer today.

**Final Choice.**  
Wife (showing new bonnet to hubby)—The milliner thought that flowers were the most becoming to me and I have always adored feathers, so we finally compromised by putting on some fruit.

**Help From the Neighbors.**  
There are few things more tantalizing to a man than to go home with something on his mind he wants to scold about and find company visiting there and be obliged to act agreeable.—Havensville (Kan.) Review.
